

DIAMOND PACKAGE DESCRIPTIONS

Angel Diamond Star Portal Energies

Founder: Robin Shelp. This is a wonderful system that is very practical and easy to use. It combines two of my favorite things - STAR ENERGIES AND ANGELS.

There are three symbols with this system, pointed Star, an Angel Symbol, and a unique diamond portal symbol - and even an ascension star! The symbols all work together to form a connection to the Higher Realms while grounding you to the Earth creating a safe portal referred to as "The Angel Diamond Star Portal". When you create your etheric Angel Diamond Star Portal it is common for Dolphins or other healing totem animals such as Unicorns to come in to assist you.

The energies are wonderful as they fill your aura with twinkling stars. Small diamond star portals can be used over each of your chakras to clear and energize them. The energies of this attunement brings empowerment, protection and helps you to radiate love and compassion for self and others.

The manual explains and illustrates how to activate these energies. The symbols and energies can be used to enhance your meditation practice as the symbols can be used to connect you safely to the Angelic Realm so that you get a clear and safely protected channel during meditation. It can be used to channel the energies through a tube of light to the Mother Earth to raise the vibration and heal the planet. It can be used in healing for self or others.

The manual also tells you how to create "Angelic Star Chi Balls" that you can use to put star energy, healing energy, love, light, peace, etc. in and send it to others. It tells you how to pass the attunements to others and explains different ways that you can use the symbols!

Rainbow Shamballa Twin Heart Diamond Dimensions

There are two attunements included in this system:

1) Kaladarshan prana

and

2) Rainbow Shamballa twin heart diamond dimensions

Rainbow Shamballa diamond is simply to realize the radiance, the natural expression of wisdom, which is beyond all intellectual concepts. It is the true realization of the Absolute Nature just as it is the ultimate completion.

Through the practice of shamballa diamond one can unmask this awareness and let its radiance arise.

the natural arising of visions of discs and rays of light. These visions are naturally ready to arise from within the central channel that joins the heart to the eyes. Such an arising from this channel will appear in a gradual process. In the same way that the waxing moon will increase from the first to the fifteenth of the month, these visions will gradually increase from the simple perception of dots of light to the full array of the vast expanse. Like the sun of 72,000 rays in a manifestation of vital energy through space and awareness will thus reach its culminating point in our etheric bodies. This is call kaladarshan.

The ordinary body made of gross aggregates will dissolve into the 'Rainbow Body of Great Transference' or 'diamond-body', or dissolve without leaving any remnants or like a crystal ball that takes on the colour of the material on which it is placed without itself being changed in a sense of Reality as limitless wholeness.

Through the practice of rainbow shambala, Love is the ultimate reality in which the dimensions form a wholeness, with no duality and no karmic existence.

Twin heart diamond dimensions reflects the cosmic love in other hearts beyond dimensions and balance the elements of your human existence.

In Alchemy, rubedo is the term for the highest vibrational level of human beings and substances. All things and beings possess an inherent potentiality to evolve „towards the light, towards rubedo, even when temporarily entangled in utter , darkness, in sickness, suffering and mindlessness, in other words, the lowest vibration called nigredo, blackness“. It is the purpose of alchemy to foster the natural development towards a higher vibration, towards order, harmony, love, sensitivity and awareness.

Consequentially, Rubedo is the name of extraordinary elixir.

The alchemists and cabalists speak of the water of life in terms of for example the Ab-e-Hyat or 'prickling, fiery essence'. More commonly it is called the 'alkahest' or common solvent. The alchemist makes his tincture by purifying his body, his emotions and his thoughts, until he identifies himself with his divine essence. When the divine essence has been realized, the water of life pours forth and takes away all remaining dross, leaving pure gold.

These energies unify the full spectrum of light forming one. And what it is beyond the light, the core of love.
