## **Energize Chakra Shakti**

By Hari Winarso. Energize Chakra Shakti is a potent energetic tool with powerful metaphysical properties... that energizes your entire system and creates significant and powerful stimulation of all chakras.

It is potent for spiritual grounding and it will ground you through the earth chakra very quickly. It will then return up the body and after stimulating the Root Chakra, Sacral Chakra and Solar Plexus Chakra ... it will move the energy up through the Heart Chakra and link to the higher Chakras.

It will energize the Third Eye chakra and the Crown Chakra to open you to high frequency energy... which it then brings back down to the lower chakras.

This process happens quite quickly... in only a few minutes. It is powerful for manifesting your visions from your third eye... which is where you form ideals in your imagination. This stone may enhance your creativity through the power of its energy to unlock your imagination. This energy increase passion or to assist with any problems in that area. Through the Sacral Chakra, this energy may aid the reproductive area and the endocrine system. It can clear energy blocks anywhere in the chakra system, allowing a better flow of energy within the entire system.

## **First Light**

First Light is a very powerful system that works with Kundalini energies in a more advanced way. It is a very transformational energy that can help you achieve clearing, healing, and spiritual ascension. There is nothing to fear with this system. I find it to be very beneficial in many ways. There are several attunements with this system which are all given at once, in a way that automatically comes in a gentle, yet powerful way, once the attunement begins. It would be beneficial for you to have been attuned to Kundalini before receiving it, though it is not necessary.

First Light is said to use energies, called Drisana, that are of a Tibetan origin. First Light allows a person to receive powerful energies that shift the perceptions of their being - spiritual, physical, and emotional.

First Light does not use symbols, energy levels can be set, becomes more effective and powerful with usage, works independently of any religion or belief system, increases the effectiveness of meditation and helps clear your system.

"First Light" is an initiation where you receive powerful energies that you can then access at any time for yourself or others by mentally directing the flows, which mean no visualization, complex symbols, mantras, etc.

Once you are attuned to the energies, you only need to think the 'key' word or phrase to run the energy on yourself or others. The more you activate the attunements, the stronger they will flow within your system.

You will receive the following energies in 24 attunements (24-in-1):

This transference of energy from the master is an initiation that activates an inner enfoldment of awareness that leads to progressively higher states of consciousness. You can envision this energy as one candle lighting another candle – the Master projects a current of Divine Power (Shakti) into your subtle body. This in turn releases your inner prana (life force). This transference does not take any effort at all; your only duty is to surrender, the Shaktipat is spontaneous. The manifestation of Shakti is solely the work of the Divine power (Shakti) Itself.

The Sun is to be installed in the temple of our body so that it dispels darkness by its effulgence once and all for all time-the darkness of ignorance.

Surya is portrayed with hair and arms of gold, three eyes, and four hands holding water lilies the flower that longs for the dawn and drives a chariot pulled by seven horses representing the seven days of the week. In Hindu religious literature, Surya is notably mentioned as the visible form of God that one can see every day.

The Indian system of beliefs regards sunlight as the greatest of disinfectants; hence the sun is associated with healing power.
