Rainbow Shamballa Twin Heart Diamond Dimensions

By Ramon Martinez Lopez. There are two attunements included in this system:

1) Kaladarshan prana

and

2) Rainbow Shamballa twin heart diamond dimensions

Rainbow Shamballa diamond is simply to realize the radiance, the natural expression of wisdom, which is beyond all intellectual concepts. It is the true realization of the Absolute Nature just as it is the ultimate completion.

Through the practice of shamballa diamond one can unmask this awareness and let its radiance arise.

the natural arising of visions of discs and rays of light. These visions are naturally ready to arise from within the central channel that joins the heart to the eyes. Such an arising from this channel will appear in a gradual process. In the same way that the waxing moon will increase from the first to the fifteenth of the month, these visions will gradually increase from the simple perception of dots of light to the full array of the vast expanse. Like the sun of 72.000 rays in a manifestation of vital energy through space and awareness will thus reach its culminating point in our etheric bodies. This is called kaladarshan,

The ordinary body made of gross aggregates will dissolve into the 'Rainbow Body of Great Transference' or 'diamond-body', or dissolve without leaving any remnants or like a crystal ball that takes on the colour of the material on which it is placed without itself being changed in a sense of Reality as limitless wholeness.

Through the practice of rainbow shamballa, Love is the ultimate reality in which the dimensions form a wholeness, with no duality and no karmic existence.

Twin heart diamond dimensions reflect the cosmic love in other hearts beyond dimensions and balance the elements of your human existence.

Rainbow Man Ascension Reiki

Ascension Reiki consists of nine comprehensive multi-level attunements that connect the recipient with the divine energy of the Ascended Masters and the Elohim. It is not clear who created this system, but it comes with a comprehensive manual that provides affirmations for each attunement as well as symbols. There are also moving meditation practices in here such as the Rainbow Man Exercise.

Please note: There are some references to certain types of breathwork that are not explained in the manual, but these special breaths are not necessary to perform or receive the attunements.

Rainbow Mandala Empowerment

Rainbow Mandala is not a healing system. Rainbow Mandala helps to open and expand one's compassion, meditative insight, and inner divinity, guiding the soul toward expressing its spiritual nature through its physical limitations. Rainbow Mandala works effectively at harmonizing the lower and higher chakras.

It gives a grounded presence, influencing alignment with the Earth. It also frees the spiritual capacities that tend to remain trapped in the upper energy centers to converge more fully throughout the body. It also creates an emotional balance, structuring a protective field that allows the chakras to remain open without experiencing feelings of being overly exposed. Promotes clairvoyance.

Rainbow Sequence Healing Technique

The Rainbow Sequence Healing Technique was founded by the Rev. Anna May followed by inspired communications with a number of Light Beings. In particular the Avalonians and Lemurians were instrumental in bringing these high vibrational connections to her.

In a channeled message, Lemurian Goddess Amara states the purpose of the Rainbow Sequence Healing Technique:

"Through work with the full spectrum that is inherent in pure white, Universal Life Force Energy, you are concentrating the facets of this Light. The purified components of this force can be used to refine and tailor your healing work, so that you may work with more precision, intensity and success; restoring balance and energizing the whole system. When harmony is restored and maintained at an energetic level, it is reflected in all aspects of your life and subsequently affects those around you; when your energy is raised and optimal, just being around and communicating with others means that their own energy is naturally raised through any interaction.

The spiritual evolution of humanity and planet Earth is accelerating as more and more people are feeling the call of their spiritual and universal destiny.

Working with the Rainbow Sequence Healing Technique will assist in returning you to a state of wholeness; you will be restored to your etheric blueprint and operate on the earth plane at your full potential; you are all Master Beings of Pure Love and Divine Light."

This system works alone or complements any system you may desire to use it with.

I use for chakra balancing and clearing. With regular work with this system the basal vibratory level of your body is naturally raised and when it is elevated so is your level of consciousness.

What Is A Ray?

Simply stated, a Ray is a force containing a purpose that divides its efforts into two measurable and perceptible powers: light and sound. It is a particular force or type of energy, with the emphasis upon the quality which that force exhibits and not upon the form aspect which it creates.

Light and sound are the building blocks of our universe and everything in our world of thought, feeling and action, contains them. The human aura contains the twin matrix powers of light and sound, and connects in the spin points of the etheric human body and often a healer with developed psychic abilities will note certain colors and sound frequencies in the aura when rendering a diagnosis. Nature mimics a similar pattern. Describe in sacred geometry. Each specific color and sound carries a certain vibration creating and producing different results.

Once attuned to the Sacred Rainbow Ribbon all lower negative energies, psychic attacks that touch the ribbon will be transmuted into loving healing energy therefore bringing you protection. Tachyon Reiki

In this course you will learn how to create different kinds of Tachyon antennas. A Tachyon antenna is an item that has been permanently altered on a sub-molecular level, so that it acts as a receiver and transmitter of Tachyon, which then will convert itself into life force (also called prana, love of God, Tachyon, chi etc.). Life force is the foundation for everything. It's highly intelligent and will automatically convert to the specific energy needed in the body.

You will learn to create:

- The Life Nugget
- Tachyon water
- EMF Phone Filters
- Tachyon "Attunement oil" (will enhance the attunements of any system)
- Tachyon Discs (For charging items and rooms)
- Tachyon Chakra Stones (For cleansing and charging chakras)
- plus more...

You will further receive methods on how to pass on attunement. Tachyon is highly recommended as a companion for Kundalini Reiki (and other attunement systems), as the Tachyon will significantly enhance and boost not only healing sessions, but also the attunement procedure itself.

Walking the Rainbow with Dolphin Trilogy Reiki

Walking the Rainbow Reiki was written and developed by Sheryl Carter. It is a very powerful healing modality and is the follow-on course to Dolphin Trilogy Reiki **which you will need to have received first before you take this attunement** (included with this package).

In her manual/workbook to accompany this system Sheryl Carter writes, "In the Hawaiian culture when someone had passed on they are said to have "Walked the Rainbow" Thus it is fitting that this system will help us tap those other realms with ease and teach us new ways of using the energy to help us on our spiritual path of growth and ascension.

This is a guide to advanced principles and techniques designed to accelerate ascension of the human consciousness through the study and practice of Spiritual healing and applying those practices to walking the (your) spiritual path.

This workbook will guide you through the various steps of Spiritual healing to help you understand what is required for your personal ascension process. Now with that said, let us begin our journey here and bring Dolphin Trilogy Reiki to the next level!

It is now time for the next leap in the dolphin-human interaction. Most of us know that dolphins and Orcas are not originally from this planet. They are highly evolved Star Beings from other stars and galaxies, most being from Sirius and Atlantis. As Beings of light, these species possess a very high-energy vibration. To be able to communicate with them effectively and receive their guidance clearly we must be able to hold the vibrational frequency to which they radiate. That is one goal of this manual; to teach you to be able to hold the vibration and sustain it for longer periods of time."

The manual/workbook is very comprehensive and in depth (65 pages) and covers all aspects of the system which should be studied and completed BEFORE the attunement.

The manual includes:

- *Study of the higher Chakras, including Earth Star chakra, Soul Star chakra, Thymus chakra, and Diaphragm chakra

- *A meditation for opening the 12 chakras and connecting with the Christ Consciousness

- *Grounding and Protection Techniques and Meditation

- *Rainbow Trilogy Protection Ring Dolphin/Whale Crystal Triad Meditation

- *The Role Of The Light Worker

- *A discussion of the Four Pillars and the Principles that support them *Assessing the Akashic Records
